Several definitions have been proposed by researchers over the years, but a common thread remains: job satisfaction reflects an employee?s emotional response to their job and the extent to which their job fulfills their needs and desires.

For instance, Locke (1976) defined job satisfaction as ?a pleasurable or positive emotional state resulting from the appraisal of one?s job or job experiences.? Meanwhile, Spector (1997) described it as ?a global feeling about one?s job or specific facets of the job.? These perspectives highlight that job satisfaction is both a subjective experience and an evaluative judgment.

Initially, research focused on understanding worker morale during the industrial revolution, emphasizing factors like wages and working conditions. Over time, the focus expanded to include psychological and social factors, recognizing that satisfaction is influenced by more than just monetary compensation.

The emergence of human relations theories in the mid-20th century, notably Elton Mayo?s Hawthorne Studies, underscored the importance of social relations, recognition, and a sense of belonging in fostering job satisfaction. Later, motivation theories such as Maslow?s Hierarchy of Needs and Herzberg?s Two-Factor Theory provided deeper insights into the intrinsic and extrinsic factors impacting employee contentment.
